taylandurmaz@windowslive.com

Antalya, Turkey

## EXPERIENCE

**Marketing House by Eyula**                                    06/2023 — 07/2023

**Software Developer Intern**

Contributed to the development of a data management platform for advertising analytics.

- Developed and integrated features using the Facebook API to retrieve ad data for storage in a MySQL database. It works inside a Linux server retrieving data at intervals for every possible customer.
- Engineered a backend server for efficient data retrieval and processing. It takes the data and calculates meaningful results from those data. After appropriately connecting the data, it goes to the frontend for further processing.
- Enhanced front-end JavaScript functionalities to transform backend data into interactive, meaningful charts. This data is stored behind a user password for each customer's use.

Languages: JavaScript, Python, HTML, CSS, MySQL

## EDUCATION

**Antalya Bilim University, Computer Engineering**                  2021 — Present

**Adem tolunay High School**                                      2016 — 2020

## PROJECTS

- I have made a github page, which gives information about my previous projects and their source codes. You can access it from the first link at the beginning of the page. It includes a game written only in Javascript and the source code of some projects.
- Also I added the link to my github repositories which includes a few of my projects. You can go there by clicking the second link at the beginning of the page. It includes the source code of the webpage and a few public repositories.

## KNOWLEDGE

- Code: Javascript, CSS, HTML, Python, C#, Java, SQL
- Developer Tools: Git, Github, Gitlab, Postman, JetBrains IDEs, Visual Studio
